

AI Roadmap

Move from scattered AI initiatives to an actionable roadmap that aligns your organization and creates sustainable momentum in thoughtful AI adoption.

ORGANIZATIONS KNOW AI MATTERS

76% OF CEOS identify it as technology most likely to disrupt their industry*

3 OUT OF 4 EMPLOYEES report their organization has NOT communicated a clear plan**

The gap between urgency and strategy is where most organizations get stuck.
An AI ROADMAP closes that gap.

FIVE-PHASE APPROACH

ALIGN & DISCOVER

Understand your business, workflows, goals and current state of adoption

ASSESS & IDENTIFY

Map AI opportunities and gauge organizational readiness

PRIORITIZE USE CASES

Score and rank opportunities against business value and feasibility

DEFINE FUTURE STATE

Map required data, technology, governance and organizational changes

BUILD ROADMAP

Sequence initiatives with owners, timelines, KPIs and a 90-day action plan

OUTCOMES

A clear, shared vision of what AI should accomplish for the organization

Honest assessment of organizational readiness and capability gaps

Prioritized use cases distinguishing quick wins from longer-term strategic bets

A practical 12- to 18-month roadmap that sequences initiatives based on value and dependencies

Clarity on governance, data, technology and skills requirements

A concrete 90-day action plan so strategy becomes execution
